Currency	EUR
ISIN code	LU2220397462
Bloomberg code	TRMREZC LX
Management fee	1.80%
Ongoing charges (incl. management fee) as of 30/06/2023	2.23%
Distribution type	Capitalisation
Minimum investment	EUR 0.00

The aim of Triodos Emerging Markets Renewable Energy Fund is to achieve long-term capital growth, combined with positive environmental and social outcomes. The investment strategy is to invest capital into renewable energy projects in developing countries, primarily via long-term senior debt to wind, solar and run-of-the-river hydro projects.

The fund has sustainable investment as its objective as set out in [article 9 of the SFDR](#).

The sustainable investment objectives are:

1. Increase renewable energy capacity
2. Access to clean and affordable energy
3. Promote social and economic opportunities

The product may be exposed to risks. Please refer to the prospectus and the PRIIPs KID for more detail.

Highlights

- TEMREF's return was -0.2% (YTD: -0.2%). This return was mainly driven by interest income, however negatively affected by mark-downs on the equity investments. The majority of loans are floating and benefit from relatively high base rates.
- In February, the fund invested EUR 27k to an existing equity investment. No new disbursements were made. TEMREF signed a new loan for a distributed solar-energy project in Brazil for an amount of USD 2.5 million. A first disbursement is expected shortly. The investment pipeline remains well filled with new opportunities at various stages in the investment process.
- Emerging markets activity remains resilient and is benefitting from a strong US economy. Renewable energy outlook remains positive. Many emerging market countries are supporting the development of new renewable energy capacity.

Net Return in %

As per end of February 2024

	1M	3M	YTD	1 Y	3Y avg	5Y avg	Since inc.
Fund	-0.17	0.48	-0.17	1.34	-	-	-0.44

	2022	2023
Fund	-1.85	1.85

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. As of 31 March 2023, the financial return of this share class no longer includes the return of the side pocketed asset. For performances purpose only, the side pocketed asset was treated as a reinvestment of a dividend. Past performance is not a reliable indicator of future performance.

SDG contributions attributable to the fund

Environmental and social impact Q2 2023

The fund's investees typically report environmental impact data 30 days after each quarter end, thus data is presented on a one quarter lagged basis. Social impact data is reported by investees 30 days after each year end. Therefore, social impact indicators will be reported as part of the fund's more detailed [annual impact report](#).
*The average electricity usage per household in the relevant operating country (if data is not available, then a proxy for the relevant region is applied).

Cumulative Performance Chart

As per end of February 2024

Fund managers

Tim Crijns and Willy Bulsink
"The strongest growth in power demand will come from non-OECD countries due to population growth, economic development and current electricity deficits. At Triodos we're well positioned to support this essential transition by financing clean energy opportunities that otherwise may not be funded, thus offering additionality to investors."

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. As of 31 March 2023, the financial return of this share class no longer includes the return of the side pocketed asset. When included, return for 2023 ranges from 1.93% to 4.29% depending on share class. For performances purpose only, the side pocketed asset was treated as a reinvestment of a dividend. Past performance is not a reliable indicator of future performance.
