Triodos Microfinance Fund provides private debt and equity to financial services providers that empower people and small businesses across the globe.

The fund has sustainable investment as its objective as set out in **article 9 of the SFDR**. The sustainable investment objectives of Triodos Microfinance Fund are:

- to promote individual wellbeing through the advancement of financial inclusion;
- to support the transition to equitable and sustainable local economies; and
- to transform the financial system for a sustainable future.

The product may be exposed to risks. Please refer to the prospectus and the PRIIPs KID for more detail.

Highlights

- Monthly return was 0.3% (YTD: 0.7%), resulting from positive performance of both the equity and the debt portfolios.
- Investments amounted EUR 2.3m (vs EUR 12.3m repayments). No new investments were made in March. TMF has sold its equity stake in Sonata Finance, as well as a partial stake in Utkarsh Small Finance Bank, investees that are both focusing on providing microfinance to the underserved in India.
- Stable global monetary policy and rising commodity prices bolster emerging markets. Global inflation decreases, primarily due to lower food prices, though at a slower rate. Recent interest rate cuts in Colombia, Chile, and Brazil ease the borrowing costs.
- In April 2024, extensive flooding impacted several regions of Kazakhstan. Massive snow melt caused freshets resulting in the Orsk Dam collapsing, near the Kazakh border. Thousands of people were evacuated, and hundreds of livestock have drowned in floods. TMF has investments in three microfinance organisations in Kazakhstan. As their presence in the affected regions is confined, these investments are not at risk. At the same time, they are seeking ways to support their clients in the affected regions. Once again, the availability of microloans will be crucial for many to rebuild their businesses after the floods, serving as a prime example of attacking climate injustice.
