Benchmark Compounded Benchmark Triodos Euro Bond Impact Fund

SFDR article 9

The fund has sustainable investment objectives aligned with SFDR article 9 criteria. These objectives are:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

Triodos Euro Bond Impact Fund aims to generate positive impact and stable income from a concentrated portfolio of investment-grade, euro-denominated bonds issued by listed companies, and semi-public institutions and EU member state governments.

The fund mainly invests in impact and other corporate bonds whose proceeds must finance projects that contribute to at least one of the following transitions: resource transition, energy transition, food transition, societal transition or wellbeing transition. Bond investments must be investment grade and denominated in EUR.

Highlights

- Triodos Euro Bond Impact Fund generated a return (after costs) of 0.13%, while the benchmark yielded 0.33%.
- The year has started on a positive note for bond markets. Eurozone bond yields initially got dragged higher by US Treasury yields, which rose as Fed rate cuts were priced out on strong data and Trump's political agenda. In the second half of the month sentiment turned with eurozone yields moving lower on the ECB policy rate cut, a further weakening macro picture for the eurozone and lower than expected inflation. Spreads on sovereign bonds from southern-European countries tightened on positive risk sentiment. Corporates outperformed sovereign bonds over the month, with Financials outperforming the broader market.
- The fund had a positive performance, trailing its reference index over the month. The performance difference mainly stems from the negative selection effect, resulting from the non-allocation to Financials. The allocation effect was positive. The curve change and curve-carry effects were neutral.

Net Return in %

As per end of January 2025

	1M	3M	YTD	1 Y	3Y avg	5Y avg
Fund	0.13	0.89	0.13	2.23	-3.30	-2.91

Top 3 SDGs of the fund

All our investments contribute to one or more of the UN SDGs. For regular bonds this contribution is based on the % of revenues from products and services with positive impact. For impact bonds the contribution is based on the % of the proceeds used to fund assets and/or projects. The maximum score is 1. The contribution data for the benchmark is not yet available. We strive to publish this data in 2025.

Contribution Transition Theme

All our investments contribute to one or more of the five transitions. For corporate bonds this contribution is based on the % of revenues from products and services with positive impact. For impact bonds the contribution is based on the % of the proceeds used to fund assets and/or projects with positive impact. Sovereign bonds are out of scope, as these are not impact investments. The overall positive contribution of the fund is 88.4 %.

Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO₂ per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio.

Non-recycled waste ratio: For each company the non-recycled waste ratio is the total amount in metric tons of non-recycled waste produced divided by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Risks

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level. The product may be exposed to risks, such as concentration risk and interest rate risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

When investing in the fund, please take into account all the characteristics and/or objectives of the promoted fund as described in its prospectus. Further, please take notice of the sustainability aspects of the fund as found [here](#).
