Benchmark	Compounded Benchmark Triodos Euro Bond Impact Fund

Triodos Euro Bond Impact Fund aims to generate positive impact and stable income from a concentrated portfolio of investment-grade, euro-denominated bonds issued by listed companies, and semi-public institutions and EU member state governments.

We select companies for their contribution to our seven sustainable transition themes. Through integrated financial and sustainability analysis we identify the drivers of a company's long-term value creation and assess the impact of ESG materiality on these drivers. Additionally, the companies we invest in must comply with the Triodos strict minimum standards. This product is not without risks. Please see the prospectus and the KID for more detail.

Highlights

- Triodos Euro Bond Impact Fund generated a return (after costs) of -1.37%, while the benchmark yielded -1.44%.
- During the month, bond yields continued to rise but at a slower pace than in previous months. The rise in yields was again triggered by record-breaking inflation numbers and expectations for more aggressive monetary policy tightening. The fund outperformed its reference index mainly due to the overweight position in government-related bonds which performed relatively well and an underweight position in treasury bonds which was the worst performing category. Selection effect was negative. The curve change contribution was positive.
- The fund continues its defensive stance being neutral duration and focusing on higher quality bonds. For government bonds we expect the yield curve will flatten as the year proceeds. The recent strong upward movement in yields means markets have already priced in a substantial part of the upcoming tightening. We expect that the long end of the curve will stay at the same level due to a worsening growth outlook and a halt in the rise of inflation expectations. Furthermore, we expect that credit spreads will continue to widen due to less monetary stimulus.

Ecological footprint relative to benchmark

12% less

GHG Emissions

Equal to emissions of driving 283.90 times around the globe

82% less

Water consumption

Equal to the water use of 25.91 million daily showers

28% less

Landfill waste

Equal to 35,074.30 household garbage bags of waste

The footprints are calculated using carbon emissions data from ISS ESG, and water and waste data from S&P Trucost (© 2019 S&P Trucost Limited). For the Benchmark, coverage by weight is 63% for carbon emissions, 30% for water use data and 30% for waste produced. For the Triodos Euro Bond Impact Fund portfolio, coverage of assets invested – by weight – is 63% for carbon, 32% for water, and 32% for waste. As per January 2022 ISS ESG has updated the calculation methodology to further align with regulatory standards (SFDR) and reporting frameworks (PCAF and TCFD).
