

Triodos Emerging Markets Renewable Energy Fund

EUR-R-dis | Factsheet December 2024

Fund characteristics

Inception date	29/10/2021
Net asset value	USD 43,631,431
Share count	
Domicile	Luxembourg
Management company	Triodos Investment Management
Custodian	CACEIS Bank, Luxembourg Branch
Investment manager	Triodos Investment Management
Legal status	Semi open-ended sub-fund of Triodos SICAV II
European passport	Yes
Investment horizon	Long term
Valuation	Monthly
Asset class	Alternative
Supervisor	CSSF

Share class details

NAV share price	EUR 23.65
Share class inception date	30/11/2021
Currency	EUR
ISIN code	LU2220397389
Bloomberg code	TRMRERD LX
Management fee	2.35%
Ongoing charges (incl. management fee) as of 30/06/2024	2.56%
Distribution type	Distribution
Minimum investment	EUR 0.00

The aim of Triodos Emerging Markets Renewable Energy Fund is to achieve long-term capital growth, combined with positive environmental and social outcomes. The investment strategy is to invest capital into renewable energy projects in developing countries, primarily via long-term senior debt to wind, solar and run-of-the-river hydro projects.

The fund has sustainable investment as its objective as set out in [article 9 of the SFDR](#).

The sustainable investment objectives are:

1. Increase renewable energy capacity
2. Access to clean and affordable energy
3. Promote social and economic opportunities

The product may be exposed to risks. Please refer to the prospectus and the PRIIPs KID for more detail.

Highlights

- The monthly return of the fund was 2.7% (YTD: 2.6%).
- The December performance was driven by the good performance of the Green Growth Equity Fund (GGEF), and positive interest income from the debt portfolio. GGEF, managed by Eversource, focuses on addressing climate change in India by investing across several key segments: renewable energy, energy storage, e-mobility, energy efficiency and resource conservation, including water and waste management. The solid return for the year 2024 was driven by positive performance across both equity and debt. The performance difference to non-US dollar share classes can be attributed to the wide interest rate differentials to the US dollar resulting in material share class hedging costs.
- The fund disbursed USD 2m to Bailyk Finance in Kyrgyzstan, supporting their high-impact green loan program. In addition, two transactions were signed, a wind project in Chile, and rooftop solar financing in Bangladesh, which reduced the uncommitted cash ratio significantly.
- The renewable energy sector in emerging markets is set for strong growth, driven by supportive government policies, falling technology costs, and increasing investment. Key regions like India, Brazil, and Africa continue expansion in solar, wind, and storage projects. Challenges include regulatory uncertainty and supply chain issues, but overall, the outlook is positive, with accelerating demand for clean energy and increased capital inflows.

Net Return in %

As per end of December 2024

	1M	3M	YTD	1 Y	3Y avg	5Y avg	Since inc.
Fund	2.69	2.47	2.65	2.65	0.94	-	0.61
				2022	2023	2024	
Fund	-	-	-1.70	1.92	2.65		

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. As of 31 March 2023, the financial return of this share class no longer includes the return of the side pocketed asset. For performances purpose only, the side pocketed asset was treated as a reinvestment of a dividend. Past performance is not a reliable indicator of future performance.

SDG contributions attributable to the fund

Environmental and social impact Q2 2024

The fund's investees typically report environmental impact data 30 days after each quarter end, thus data is presented on a one quarter lagged basis. Social impact data is reported by investees 30 days after each year end. Therefore, social impact indicators will be reported as part of the fund's more detailed [annual impact report](#).

*The average electricity usage per household in the relevant operating country (if data is not available, then a proxy for the relevant region is applied).

Cumulative Performance Chart

As per end of December 2024

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. As of 31 March 2023, the financial return of this share class no longer includes the return of the side pocketed asset. When included, return for 2023 ranges from 1.93% to 4.29% depending on share class. For performances purpose only, the side pocketed asset was treated as a reinvestment of a dividend. Past performance is not a reliable indicator of future performance.

Fund managers

Tim Crijns and Willy Bulsink

“Global power demand is set to grow rapidly, driven by population growth, economic development, and existing electricity deficits. At Triodos, we are uniquely positioned to drive this critical energy transition by financing clean energy opportunities in developing markets that might otherwise go unfunded, delivering impactful solutions and additionality for our investors.”
