NAV share price	EUR 23.33
Share class inception date	30/11/2021
Currency	EUR
ISIN code	LU2220397389
Bloomberg code	TRMRERD LX
Management fee	2.35%
Ongoing charges (incl. management fee) as of 31/12/2024	2.97%
Distribution type	Distribution
Minimum investment	EUR 0.00

The aim of Triodos Emerging Markets Renewable Energy Fund is to achieve long-term capital growth, combined with positive environmental and social outcomes. The investment strategy is to invest capital into renewable energy projects in developing countries, primarily via long-term senior debt to wind, solar and run-of-the-river hydro projects.

The fund has sustainable investment as its objective as set out in [article 9 of the SFDR](#). The sustainable investment objectives are:

1. Increase renewable energy capacity
2. Access to clean and affordable energy
3. Promote social and economic opportunities

The product may be exposed to risks. Please refer to the prospectus and the PRIIPs KID for more detail.

Highlights

- The monthly return of the fund was -0.1% (YTD: -1.4%).
- The fund performance was driven by solid income from the fund's debt investments, slightly offset by negative FX results.
- The fund had no disbursements in May.
- Global demand for clean and affordable energy remains strong, despite US pushback on renewable energy. Mexico and Colombia are investing in renewable infrastructure and reducing taxes on renewables, while India and China, as major emitters, continue to support renewables to cut emissions and drive technological advancements. According to Bloomberg, China continues leading investments in wind power in Central Asia. In June, China installed its fourth wind factory company in Uzbekistan. This contributes to the wind power boom that Uzbekistan and Kazakhstan are currently undergoing and which governments in these countries are keen to support. Most major emerging economies are well-positioned and resilient to shifting trade dynamics. Strong domestic demand in countries like India, Brazil, Nigeria and China continues to sustain growth. Additionally, trade partnerships are shifting as emerging markets search for new partners outside the US to diversify their trade opportunities. The fund portfolio sees minimal immediate impacts from US tariff uncertainty due to low US supply chain dependencies.

Net Return in %

As per end of May 2025

	1M	3M	YTD	1 Y	3Y avg	5Y avg	Since inc.
Fund	-0.09	-0.72	-1.35	2.82	0.90	-	0.15
				2022	2023	2024	
Fund		-	-	-1.70	1.92	2.65	

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. As of 31 March 2023, the financial return of this share class no longer includes the return of the side pocketed asset. For performances purpose only, the side pocketed asset was treated as a reinvestment of a dividend. Past performance is not a reliable indicator of future performance.

SDG contributions attributable to the fund

Environmental and social impact Q4 2024

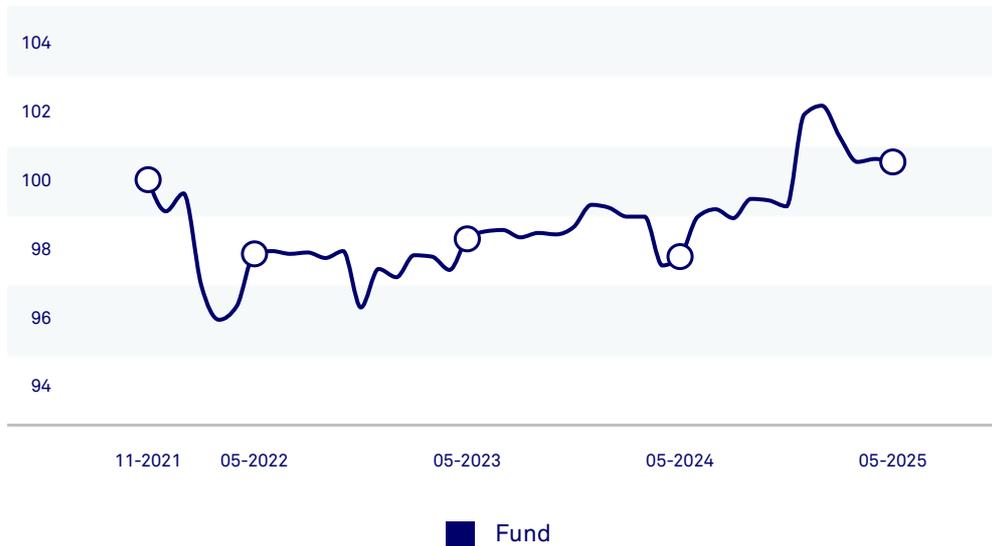

The fund's investees typically report environmental impact data 30 days after each quarter end, thus data is presented on a one quarter lagged basis. Social impact data is reported by investees 30 days after each year end. Therefore, social impact indicators will be reported as part of the fund's more detailed [annual impact report](#).

*The average electricity usage per household in the relevant operating country (if data is not available, then a proxy for the relevant region is applied).

Cumulative Performance Chart

As per end of May 2025

All returns stated have been calculated based on net asset values, including reinvestment of dividends where applicable. As of 31 March 2023, the financial return of this share class no longer includes the return of the side pocketed asset. When included, return for 2023 ranges from 1.93% to 4.29% depending on share class. For performances purpose only, the side pocketed asset was treated as a reinvestment of a dividend. Past performance is not a reliable indicator of future performance.

Fund managers

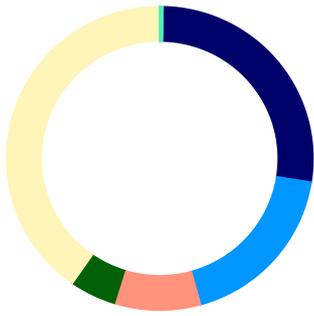

Tim Crijns and Willy Bulsink

“Global power demand is set to grow rapidly, driven by population growth, economic development, and existing electricity deficits. At Triodos, we are uniquely positioned to drive this critical energy transition by financing clean energy opportunities in developing markets that might otherwise go unfunded, delivering impactful solutions and additionality for our investors.”
