**Triodos Microfinance Fund provides private debt and equity to financial services providers that empower people and small businesses across the globe.**

The fund has sustainable investment as its objective as set out in **article 9 of the SFDR**.

The sustainable investment objectives of Triodos Microfinance Fund are:

- to promote individual wellbeing through the advancement of financial inclusion;
- to support the transition to equitable and sustainable local economies; and
- to transform the financial system for a sustainable future.

*The product may be exposed to risks. Please refer to the prospectus and the PRIIPs KID for more detail.*

## Highlights

- The monthly return of the fund was -0.2% (YTD: 0.1%).
- Stable interest income and unrealised equity gains partially offset the impact of a negative result on FX and FX contracts on the performance.
- In February, the fund disbursed EUR 635k to an existing investee, Garantia, which provides leasing products for medical equipment to small healthcare providers and clinics in rural Mexico. Furthermore, the fund received EUR 4.1m in repayments.
- The global economy entered 2026 with resilient growth, despite ongoing geopolitical and trade uncertainties. Countries are increasingly diversifying trade relationships, with stronger links between major economies and emerging markets. This supports employment and small-business growth, resulting in demand for microfinance and stable borrower repayment capacity in many of the fund's core markets. Recently, the Middle East conflict has caused regional unrest, higher oil prices, supply chain disruptions, and slightly raising inflation forecasts. Mitigating measures have been taken like releasing strategic petroleum reserves. The fund has almost no remaining exposure left in the region, following the gradual wind-down of the regional portfolio in recent years. The remaining exposure is 0.1% in Jordan that will be repaid mid-March.

### Fund managers

#### Tim Crijns and Florian Bankeman

"In July, the Global Findex 2025 was published, the World Bank's worldwide database on access to financial services. The report states: "Many people who are financially excluded are also excluded from other services such as education, infrastructure, labor markets, connectivity, and even from participation in institutions" which substantiates the positive impact of investments in financial inclusion."
