Minimum investment EUR -

Benchmark Compounded Benchmark Triodos Impact Mixed Fund - Offensive

SFDR article 9

The fund has sustainable investment objectives aligned with SFDR article 9 criteria. These objectives are:

- make money work for environmental and social change
- contribute to the transition to an economy within planetary boundaries
- contribute to the transition to an economy where all humans can enjoy a prosperous life.

Triodos Impact Mixed Fund - Offensive aims to generate positive impact and competitive returns from a concentrated portfolio of global equity positions and investment-grade corporate, sovereign and sub-sovereign bonds.

The fund mainly invests in equities of companies in developed countries and, to a lesser extent, in impact and other corporate bonds and government bonds. These companies and the proceeds of the impact and corporate bonds must contribute to, or finance projects in, at least one of the following transitions: resource transition, energy transition, food transition, societal transition or wellbeing transition. Bond investments must be investment grade and denominated in EUR.

Highlights

- Triodos Impact Mixed Fund - Offensive generated a return (after costs) of -2.18%, while the benchmark yielded -2.82%.
- Donald Trump's 'Art of the Deal' methodology is now also running the capital markets. The heavily announced 'Liberation Day' turned out in a political play and pushed markets much lower. The White House is unpredictable and for that reason it is creating uncertainty in the real economy and financial markets. High quality Euro bonds offered some compensation.
- The fund posted a negative return as equities suffered more than bonds could compensate for. Although the reported earnings are still good on average, many stock drifted down on lower expectations because of tariffs. Best relative performance stemmed from Danone (+7%), Carlisle (+6%) and National Grid (+5%). Largest negative returns were posted by Enphase (-31%), Alexandria Real Estate (-25%) and Smurfit Westrock (-11%). The fund remains to be geared to overweight positions in Consumer Staples, Health Care and higher quality, euro dominated bonds. All investments contribute to the Triodos transition themes.

Net Return in %

As per end of April 2025

	1M	3M	YTD	1 Y	3Y avg	5Y avg

Top 3 SDGs of the fund

All our investments contribute to one or more of the UN SDGs. For equities and corporate bonds, this contribution is based on the % of revenues from products and services with positive impact. For impact bonds the contribution is based on the % of the proceeds used to fund assets and/or projects with positive impact. The maximum score is 1. The contribution data for the benchmark is not yet available. We strive to publish this data in 2025.

Contribution Transition Theme

All our investments contribute to one or more of the five transitions. For equities and corporate bonds, this contribution is based on the % of revenues from products and services with positive impact. For impact bonds the contribution is based on the % of the proceeds used to fund assets and/or projects with positive impact. Sovereign bonds are out of scope, as these are not impact investments. The overall positive contribution of the fund is 74.4%.

Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO₂ per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio. Non-recycled waste ratio: For each company the non-recycled waste ratio is the total amount in metric tons of non-recycled waste produced divided by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Risks

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level. The product may be exposed to risks, such as concentration risk, currency risk and interest rate risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

When investing in the fund, please take into account all the characteristics and/or objectives of the promoted fund as described in its prospectus. Further, please take notice of the sustainability aspects of the fund as found [here](#).
