## Highlights

- The monthly return of the fund was -0.6% (YTD: 2.3%).
- The August performance mainly results from negative FX movements and provisions taken in Mexico, partially offset by positive equity valuations. The euro appreciated against many currencies, resulting in fx losses, particularly in US dollar, Uzbek som, Uganda shilling, Kazakh tenge, Indian rupee, Georgian lari and Bolivian bolivar. Provisions were taken in Mexico following increased post-elections investor concerns due to fears over judicial and policy reforms, as well as potential violations of trade agreements with the US, leading to a weaker peso and refinancing risks for companies. Despite these challenges, opportunities such as nearshoring and growth in services and agriculture sectors continue to support Mexico's economic outlook. Equity performance was boosted after the receipt of most semi-annual results, which were positive or outperforming in many cases. Top performers included Unity Trust Bank in the UK, 3Bank in Serbia, Centenary Bank in Uganda, Arohan in India, and Credo in Georgia.
- Investments amounted to EUR 3.2m (vs EUR 3.5m repayments). In August, the fund invested EUR 2.5m in former investee One Puhunan, a financial services provider in the Philippines. One Puhunan focuses on offering financial support to underserved low-income individuals and small businesses, addressing gaps in traditional banking services.
- Central banks in advanced economies are expected to cut rates, and, over time, global interest rates will become more favorable for emerging market borrowers. Ivory Coast has already issued debt under better conditions this year, which is positive for TMF's two investees MicroCred Ivory Coast and Bridge Bank.
