## Market developments

The real economy slowed gradually in the first half of 2019, driven particularly by slowing trade growth and broad-based manufacturing weakness. The trade dispute between the US and China saw further escalation in the first half of the year, with the Trump administration increasing tariffs on Chinese exports to the US in May and China taking immediate countermeasures. Accommodative fiscal policies from US, Europe and China worked to counter part of the global slowdown.

Emerging market currencies in the fund's portfolio strengthened somewhat against the euro in the first half, helped by a 0.7% appreciation of the USD against the euro. The Tunisian dinar, Sri Lanka rupee and Peruvian sol gained more than 3% against euro. Still, a number of currencies also became significantly cheaper in the first half, with the Ghana shilling weakening 11%, the Georgian lari falling 6%, and the Paraguayan guarani losing 3% against the euro.

The financial inclusion sector keeps growing and broadening dynamically, spurred by the recognition of the catalysing role that financial inclusion plays in supporting the achievement of basic needs. This is signaled by the heightened flow of investment capital in impact themes beyond pure microfinance,

in themes such as agriculture, housing and energy<sup>1</sup>. To better highlight this important contribution, Triodos Microfinance Fund published a new set of impact indicators related to the role that financial inclusion plays in enabling access to basic needs in its 2018 impact report. This includes such indicators as the number of students that have taken out an education loan, the number of people gaining access to clean energy thanks to a green credit and the number of people taking a new loan to buy or improve a house.

While the pace of investment in financial inclusion is growing, globally 1.7 billion adults remain unbanked according to the latest result of the Findex survey<sup>2</sup>. Yet, two-thirds of them own a mobile phone that could help them gain access to financial services. While this is a clear sign of the enormous potential new technology has in exponentially increasing access to finance, it also brings new risks both to market incumbents and low-income people, as highlighted in our recent publication “Fintech: A game changer for financial inclusion?”, published in May 2019. Positively, these risks are well recognized in the sector, and there are initiatives to ensure that the transformative opportunities offered by the fintech revolution are leveraged in a transparent, fair and responsible way. One example is the creation of new standards for responsible digital credit by the SMART campaign, which were formulated with a broad group of stakeholders, including Triodos Investment Management. These standards complement the existing SMART label and represent yet another milestone in ensuring that the lessons learnt from doing microfinance in past decades are not forgotten with Fintech.

income, a positive result on the equity portfolio, and foreign exchange movements. The depreciation of the currency portfolio over the reporting period had a negative effect on the return. Differences in performance between share classes are mainly attributable to differences in the cost bases.

### Liquidity

On June 30, 2019, the fund's liquidity ratio, including the standby credit facility, was at 11.6% (December 31, 9.5%). During the first six months of 2019, liquidity was considered adequate for the fund to meet its payment obligations and facilitate the monthly redemptions of shares.

### Costs

The largest item in the cost structure of Triodos Microfinance Fund is the management fee paid to the AIFM, Triodos Investment Management. The AIFM uses this fee primarily to cover staff-related costs, including travel expenses incurred in connection with the labour-intensive investment process. This is particularly true for the management of the fund's equity investments, which requires frequent trips to the countries where investments are made. The lead times for first investments are relatively long because of the thorough due diligence analysis that is required. Other costs include the fees paid to RBC Investor Services Bank for their depositary and administrative services.

The ongoing charges for Triodos Microfinance Fund, which include the management fee, ranged from 1.61% to 1.90% for the institutional share classes and from 2.09% to 2.58% for the other share classes as per June 30, 2019 (June 30, 2018: from 1.75% to 1.93% and from 2.13% to 2.66%, respectively). More detailed information about management fees and ongoing charges can be found on pages 27 and 28.

## Outlook

World economic growth is moderating this year, and is expected to slow down further in 2020, as particularly advanced economies slow. Given the growth slowdown and downside risks globally (due to risks of further escalation of trade war and geopolitical issues), the outlook for emerging markets has weakened somewhat. In Emerging Asia, supply chains are being disrupted by the US-China trade conflict, although some countries may also benefit from trade diversion. In Latin America, poor performance of large economies in the region makes for further spillover into their smaller trade partners. The continued low interest rate environment is positive for the short-term outlook of countries with a high debt burden.

Going along with the dynamic evolution of the financial inclusion sector, Triodos Microfinance Fund will continue its holistic strategy of working with financial institutions that focus on traditionally excluded microfinance and SME clients. The fund will continue to broaden its impact portfolio to support financial institutions that provide innovative digital financial products to the underserved segments of the market as well as institutions that focus on providing access to basic needs.

## 1. General

Triodos SICAV II (the "SICAV") has been incorporated under the laws of the Grand Duchy of Luxembourg as a "société d'investissement à capital variable" (SICAV) under the form of a "société anonyme" on April 10, 2006 for an unlimited period. Triodos SICAV II is governed by Part II of the Luxembourg Law of December 17, 2010, as amended from time to time. The SICAV is an alternative investment fund ("AIF") subject to the requirements of the Directive 2011/61/EU of June 8, 2011 on Alternative Investment Fund Manager's Directive ("AIFMD") as implemented in Luxembourg through the law of July 12, 2013 on alternative investment fund managers (the "Law of 2013").

The Registered Office of the SICAV is established at 11/13, Boulevard de la Foire, L-1528 Luxembourg.

The Articles have been deposited with the Chancery of the District Court of Luxembourg on April 27, 2006 and published in the Mémorial C, Recueil des Sociétés et Associations (the "Mémorial"). The SICAV has been registered with the Companies Register of the District Court of Luxembourg under number B 115.771. The Articles were last amended at the extraordinary general meeting of shareholders held on September 5, 2018 and published in the Recueil des Sociétés et Associations ("RESA") which replaced the "Mémorial".

The SICAV is structured as an umbrella fund, which provides both institutional and retail investors with a variety of sub-funds, each of which relates to a separate portfolio of assets permitted by law and managed within specific investment objectives.

As at June 30, 2019, the SICAV has three sub-funds: Triodos Renewables Europe Fund, Triodos Microfinance Fund and Triodos Organic Growth Fund.

The overall objective of the sub-fund is to offer investors a financially and socially sound investment in the microfinance sector mainly through investments in microfinance institutions (MFIs). The sub-fund has the prospect of an attractive financial return combined with the opportunity for investors to make a pro-active, measurable and sustainable contribution to the development of the microfinance sector into an inclusive financial sector in which the majority of people have access to financial services.

The first subscription period ended on February 27, 2009 and the first net asset value was calculated on March 31, 2009.

Shares may be subscribed once a month, on the Business Day preceding the Valuation Date. The sub-fund is semi open-ended, i.e. shares may be redeemed in principle once a month subject to a notice period. ## 2. Summary of significant accounting principles

### Presentation of the financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds.

Investments are valued as follows:

- a) The valuation of private equity investments (such as equity, subordinated debt and other types of mezzanine finance) are based on the International Private Equity and Venture Capital Valuation Guidelines, as published from time to time by the European Venture Capital Association (EVCA), and is conducted with prudence and in good faith.

In the sub-fund, the subordinated debt investments are valued on the basis of the cost value less repayments and adjustments for any impairment.

In the sub-fund, the private equity investments are valued based on the application of an earnings multiple valuation methodology.

- b) Investments in securities are accounted for on a trade date basis. Net realised profit/(loss) on sale of investments in securities are based on the average cost basis. The net realised profit/(loss) and change in net unrealised appreciation/(depreciation) on investments are recorded in the Statement of Operations and Changes in Net Assets.

Other assets are valued according to the following rules:

- c) Senior debt instruments, invested in/granted to companies not listed or dealt in on any stock exchange or any other Regulated Market, are valued at fair market value, deemed to be the nominal value, increased by any interest accrued thereon; such value is adjusted, if appropriate, to reflect the appraisal of the Advisor of the relevant sub-fund on the creditworthiness of the relevant debtor. The Board of Directors uses its best endeavors to continually assess this method of valuation and recommend changes, where necessary, to ensure that debt instruments are valued at their fair value as determined in good faith by the Board of Directors.

The senior debt instruments held by the sub-fund Triodos Microfinance Fund are valued on the basis of the cost value less repayments and adjustments for any impairment.

- d) The value of money market instruments not listed on any stock exchange or dealt in on any other Regulated Market and with a remaining maturity of less than 12 months is deemed to be the nominal value thereof, increased by any interest accrued thereon.
- e) The value of securities which are admitted to official listing on any stock exchange is based on the latest available price or, if appropriate, on the average price on the stock exchange which is normally the principal market of such securities, and each security dealt on any other Regulated Market is based on the last available price. In the event that this price is, in the opinion of the Board of Directors, not representative of the fair market value of such securities, for example in the case of illiquid securities and/or stale prices, the directors value the securities at fair market value according to their best judgment and information available to them at that time.

- f) Units or shares of open-end UCIs are valued at their last official net asset values, as reported or provided by such UCI or their agents, or at their last unofficial net asset values (i.e. estimates of net asset values) if more recent than their last official net asset values, provided that due diligence has been carried out by the relevant Advisor, in accordance with instructions and under the overall control and responsibility of the Board of Directors, as to the reliability of such unofficial net asset values.
- g) The liquidating value of futures, forward foreign exchange contracts or options contracts not admitted to official listing on any stock exchange or dealt on any other Regulated Market means their net liquidating value determined, pursuant to the policies established prudently and in good faith by the Board of Directors, on a basis consistently applied for each different variety of contracts.
- h) The value of any cash at hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends declared and interest accrued, and not yet received are deemed to be the full amount thereof, unless, however, the same is unlikely to be paid or received in full, in which case the value thereof is determined after making such discounts as the Board of Directors may consider appropriate to reflect the true value thereof.
- i) Swap contracts, as far as credit swaps are concerned, are valued at fair market values as determined prudently and in good faith by the Board of Directors. Cross-currency interest rate swaps are valued on the basis of the prices provided by the counterparty.
- j) All other securities and assets are valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors.
- k) Placements in foreign currency are quoted in euros with due observance of the currency exchange rates most recently known.
- l) Realised and unrealised changes in the value of investments are incorporated in the profit and loss account.
- m) The principle for determination of profit is based on the attribution of income and expenses to the relevant year. The income from payments of profit on equity participations is accounted for in the year in which they are made payable. Prepaid costs and costs still to be paid are taken into account in determining the expenses.
- n) Other assets and liabilities are recorded at nominal value after deduction of any provision in respect of anticipated non-recovery.
- o) The costs of investments expressed in currencies other than EUR are translated into EUR at the exchange rate prevailing at purchase date.
- p) Interest income is accrued pursuant to the terms of the underlying investment. Income is recorded net of respective withholding taxes, if any.
- q) Gain and losses arising from un-matured forward foreign exchange contracts are determined on the basis of the applicable forward exchange rates at the valuation date and are booked in the profit and loss accounts.
- r) Dividend income is recognised on cash basis, net of any withholding taxes.
- s) Equity investments of Triodos SICAV II are excluded from consolidation due to exemptions by temporary holding, size and time window (section XVI of the modified law of 10 August 1915).

### 3. Taxation

According to the law in force and current practice, the SICAV is not subject to any Luxembourg tax on income and capital gains nor are dividends paid by the SICAV subject to any Luxembourg withholding tax.

However, each of the SICAV's sub-funds is subject to a subscription tax (taxe d'abonnement) at an annual rate of 0.05% p.a. Such rate may be decreased to 0.01% p.a. for certain sub-funds or Classes of Shares, which are restricted to Institutional Investors as specified in the relevant sub-fund Particulars.

This tax is calculated and payable quarterly on the basis of the Net Asset Value of each sub-fund at the end of each quarter. This tax is not due on that portion of the SICAV's assets invested in other Luxembourg UCIs.

Since January 1, 2010, microfinance funds are no longer subject to any subscription tax. Thus subscription tax is no longer applicable for the sub-fund.

In addition, the issue of Shares in the SICAV is not subject to any registration duties or other taxes in Luxembourg.

### 4. Administrative and depositary fees

The Depositary and Paying Agent, the Administrative Agent, the Domiciliary and Corporate Agent and the Registrar and Transfer Agent are entitled to receive fees in accordance with usual practice in Luxembourg and payable quarterly.
