PRESS RELEASE

30 September 2020

AlphaMundi invests in Amped Innovation, a fast-growing solar powered product design company

AlphaMundi is pleased to announce the first equity investment from our second fund, AlphaJiri, in Amped Innovation. Based in California, Amped Innovation designs quality, affordable high-powered products for low income, off-grid households across Sub-Saharan Africa.

AlphaJiri's investment, together with lead investor ENGIE Rassembleurs d'Energies, existing seed investor FINCA Ventures, as well as other investors, will be used to support the development of a new generation of highly efficient DC appliances, focusing on televisions, cold-chain, and diesel generator replacement solutions that are affordable to low-income households. This equity capital will be used to grow the sales, manufacturing, and engineering teams to support its growth as a B2B energy and appliance company working with last-mile distributors and SMEs.

QUOTES

Dianah Irungu, Investment Officer at AlphaMundi, said: "We are thrilled to add Amped Innovation to our portfolio. Backed by a highly skilled and innovative team, the company has made great strides in advancing access to energy for low income households in Africa, by designing and building highly efficient and affordable products. We are confident that, with our support, the company will deliver on more pioneering products to allow consumers to move further up the energy ladder and ultimately improve their quality of life and reduce energy poverty."

Andi Kleissner, Co-founder and Co-CEO of Amped Innovation, further stated: "With the support of AlphaMundi and other likeminded investors, Amped Innovation will scale the reach of its affordable, high power products to off grid customers. We continue to partner with last-mile distributors to deliver on our vision of energy access for all."

Alex Evangelides, Investment Director at FINCA Ventures, added: "Recognizing that electricity is not an end in itself, Amped has developed an impressive product portfolio to not just deliver lighting but affordable, productive-use power that can generate significant business activity across these markets. The scalable, modular design allows households and SMEs to progressively climb the energy ladder as incomes increase and energy needs grow."

About Amped Innovation

Amped Innovation delivers solar energy appliances that move people up the income ladder and bring the joy of leisure and entertainment to their homes. Amped is a B2B product design company that partners

with for-profit businesses and social enterprises to provide breakthrough solar solutions to end users across Africa, Latin America and Southeast Asia. Amped's WOWsolar platform offers a power center inside a solar energy pico system and can scale from 20 Whr to 240 Whr in a single 150W system. It supports productive use appliances for those who want to watch TV, light up their home, charge their phones, make ice, power a barber shop, preserve fish and produce, irrigate their crops and more. About AlphaMundi Group Ltd

AlphaMundi Group was created in 2008 as a Swiss advisory group dedicated to impact investing. Its mission is to provide market-based solutions to the world's most pressing challenges, currently best defined by the Sustainable Development Goals. Since 2009, AlphaMundi has profitably invested USD 64M in 47 impact ventures in Latin America and Africa, primarily through the firm's SocialAlpha impact fund and related co-investments, across 150 venture debt and equity transactions, with an impact on more than 5 million beneficiaries, the vast majority in rural areas and some 40% of women. Early in 2020, AlphaMundi launched a second fund called AlphaJiri with Triodos Investment Management and Stiftung Abendrot as anchor LPs, which targets SMEs in sustainable agriculture and renewable energy in East Africa.
